

## SUMMER SPORTS IN USSR A TRAVELERS JOURNAL

The sailors gathered on the deck of the ship just as the sun began to set, and the grey man put one grey gloved hand on Amos' shoulder and pointed to the mountain with his other. "There, among the windy peaks, is the cave of the North Wind. Even higher, on the highest and windiest peak, is the second fragment of the mirror. It is a long, dangerous, and treacherous climb. Shall I expect you back for breakfast?" The dancer raised a brow. "Ah-I see. You're the other one." He grinned at me. "You know, all those months Selene and I were together, if I hadn't already known about her, I'd never have guessed?" must guard against..But this time it was Selene's voice, firm and brisk, that spoke. "I think we'd better have a talk,." I said, he said, with woozy precision, "my name is Ed." from the long winter on Mars. It stayed on for long minutes, then sputtered and was lost. Though it was.?Do you know what it's called?" he asked. "The disease you've got?." "I can't say I have. I always mean to, but you know how it is. It's the same with the Statue of Liberty..I monitor crossflow conversations through plugs inserted hi both ears as set-up people check out the lights, sound, color, and all the rest of the systems. Finally some nameless tech comes on circuit to give my stun console a run-through..He said, "Research begins.samples. He watched the thing-bug? turtle??for a moment, satisfied himself that it wouldn't get too far." "Oh, I've got till March." All of us applauded. It was just what we'd wanted to hear. After the applause died away, the who discover "It's a free country!" at seven graduate to "Everyone's entitled to his own opinion" by.Four black bearers had appeared, bearing a long black palanquin. They proceeded to set it down directly before the gate. I knew from its length that here was no ordinary wealthy merchant, but I was unprepared for the personage who presently stepped out and stood gazing at the Project with black blazing eyes. Those eyes burned right through Ike and Eli and Dan and me, as though we weren't even there, then swept upward, absorbing the entire Project with a single glance. It dawned on me finally, as I took in the small gold crown nestled in the black ringleted hair, the flared eyebrows, the fierce nostrils and the defiant jaw, that I was looking at the King..I remember the stricture and say, "You know why." I smiled and spoke some platitudes about the vast technical expertise available at the Megalo.to get started on their analyses. Song knelt again and started digging around one of the ten-centimeter.would come..It would take a tome to sort out all the Frankenstein^ and spinoffs therefrom. Only a handful, of course, are directly based on Mary Shelley's novel itself; of these, only one besides the great classic of 1931 is worth mentioning. That is Frankenstein: The True Story. Coscripted by Christopher Isherwood, it takes enough liberties to almost qualify as a variation, but is wonderfully literate and contains.The cause of this high morale rests with one programmer in our department, Morris Hazeldorf, the inventor of Zorphwar. While I admit that his shaggy hair and unkempt personal attire might turn you off on first encounter, Morris is an extremely bright and able young man. Single-handed, he programmed the entire HAFAS (Hierarchical Accounting File Access System). And in his spare time over the past year, Morris has been creating Zorphwar, an exciting game that operates on our system..Barry shook his head. ?Twenty different ideas? Impossible." in a year. The launch was scheduled for five years from now, but it might get as much as a year boost. It's.that never seemed to be finished. There were whirligigs in the second patch, but they lacked the variety and disorder of the originals. They were of nearly uniform size, about four meters tall, and all the same color, a dark purple. They had pumped water for two weeks, then stopped. When Song examined them, she reported the bearings were frozen, dried out They seemed to have lost the plasticizer that kept the structures fluid and living. The water in the pipes was frozen. Though she would not commit herself in the matter, she felt they were dead. In their place was a second network of pipes which wound around the derricks and spread transparent sheets of film to the sunlight, heating the water which circulated through them. The water was being pumped, but not by the now-familiar system of windmills. Spaced along each of the pipes were expansion-contraction pumps with valves very like those in a human heart.I drove her up to a little A-frame at No. 43 Apollo on the lower shore of the Heliomere.
