

THE HUMAN MECHANISM THE MOST MARVELOUS

Aunt Gen said, as though Leilani had accused Maddoc of nothing worse than habitually breaking wind. To many people, the face of a victim of severe Down syndrome inspired pity, embarrassment, disquiet. appealing talk of a miraculous moment of transformation, nothing had happened to pivot Micky toward. "When he has to explain where Luki's gone, what'll he say?" Geneva wondered. "Who?" Driscoll asked automatically, tossing his cigarette butt into the incinerator and snatching up his gun. A cover in the top of Wellington's chest slid aside to reveal a small display screen on which the figures of Sirocco and Colman appeared, viewed from above. They were walking at a leisurely pace, along a corridor, talking to a handful of Chironians who were walking with them. Driscoll resumed his former posture, and moments later footsteps and voices sounded from along the wider corridor leading off to the right, and grew louder. Jean shook her head, still refusing to contemplate the prospect. "But why does it have to be over?" She looked imploringly at Bernard. "We were happy all those years in the ship, weren't we? We had our friends, like Jerry and Eve, we had the children. There was your job. Why should this planet take it all away from us? They don't have the right. We never wanted anything from them. It's-it's all wrong." But first things had to come first. It was time to begin mobilizing the potential allies he had been quietly sounding out and cultivating for the three years since the last decisions. He replaced the Korean porcelain carefully in its recess among the bookshelves and walked through the lounge to the patio, where Celia was sitting in a recliner with a portable compad on her lap, composing a note to one of her friends. "And then what?" Swley said. "You've still got to bomb your way down the feeder ramps and get into the Battle Module. Even if you ended up with any guys left by the time you reached it, there'd be plenty of time for it to get up to flight readiness before you could blow the locks." cover, meaning people as well as books, and now they are proved right again. so close. TO EVERYONE but Noah Farrel, the Haven of the Lonesome and the Long Forgotten was known as. "It hasn't started to respond yet," Stormbel said, sounding relieved for the first time in hours. "Perhaps we took them by surprise after all." He glanced at the numbers appearing on a display of orbit and course projections, "In any case, it can't touch us now." memories and long-kept traditions in addition to his prize of flesh. Cutting her serving of apple pie with the side of her fork, Leilani said, "What a pair, huh?" Abruptly the camera tilted down, too late to show the shattering of the windshield. Egyptian desert, however, and he's not aboard a faster-than-light vessel beyond the Horsehead Nebula. Colman nodded. "To start with, anyhow. Then, I guess, it's a case of how well you make out. You know how things operate here." After a pause he asked, "How about you?" "I'd love a piece, thanks," Leilani said. The D Company detachment 'came to a standstill in the corridor leading from the X-Ray Spectroscopy and Image Analysis labs, at a place where it widened into a vertical bay housing a steel-railed stairway that led up to the Observatory Deck where the five-hundred-centimeter optical and gamma-ray interferometry telescopes were located. A few Chironians who were passing by paused to watch for a moment, waved cheerfully, and went about their business. "Sure, I know about their kind." He returned the squeeze reassuringly. "You'd better believe it?" and country-and-western bars from Omaha to Santa Fe, to Abilene, to Houston, to Reno, to Denver. "Nonsense, Micky," Geneva said. "Tomorrow I can bake another apple pie all for you." "What?" Colman asked him. twice, and I don't mean dirty-old-man-going-to-jail touching. Just ordinary touching. Micky reached across the dinette table, and the girl responded without hesitation: They slapped palms in. The tailgate is hinged at the bottom. Two latch bolts fix it at the top. To her own ear, she had sounded as false as George Washington's wooden teeth, but Dr. Doom had. And? chuddaboom! the chopper is right here, passing across the Windchaser, so low, maybe fifteen. Lechat hesitated and looked uncertainly in Celia's direction. She returned an almost imperceptible nod. Lechat looked back at the screen. "Shall we just say that we can prove conclusively not only that the Chironians were blameless, but that Sterm himself arranged for the evidence to be falsified to suggest otherwise," he said. Not every delicacy is prepared by the two short-order cooks out front. The kitchen staff is large and. "When did I say that?" Leilani asked disingenuously. "An afterlife without Hell," Aunt Gen explained, "would be as polluted and unendurable as a world. sight to see with this leg brace." As though to prove how tough she was, Leilani crumpled the empty beer. But his reputation had put him in a no-win situation at the Friday night poker school because when he won, everybody said he was sharpening, and when he didn't, everybody said he was lousy. So he had stopped playing poker, but not before his name had been linked catalytically with enough arguments and brawls to get him transferred to D Company. As he stared fixedly at the wall across the corridor, the thought occurred to him that in a place with so many kids around, there ought to be a big demand for a conjuror. The more he thought about it, the more appealing the idea became. But to do something about it, he would first have to figure out some way of working an escape trick---out of the Army. Swley should have some useful suggestions about that, he thought. MEXICO. On the front, the word STARCHILD was emblazoned in two-inch red letters. "Were they ever there?" Leilani asked again. "It's how the Chironians have been working all along," Lechat said. "They've

been doing everything in their power to entice as many people as possible away from the opposition and effectively over to their side. Haven't they done it with us? When they're down to the last handful who'll never be able to think the way the Chironians think, they'll get rid of them, just as they did Padawski. That's how their society has always worked. When it comes down to the last few who won't be sensible no matter what anybody does, they don't fool around. And they'll do the same thing with the ship if Sterm makes one threatening move with those weapons up there. I'm convinced of it. The Chironians took out their insurance a long time ago. That would be typical of how they think too." "First, let's recap the main points. The primary object is to get into the Communications Center and secure it while the transmission goes out, and after that to hold it and hope that enough of the Army reacts quickly enough to take the pressure off, Okay?" There were no questions, so Sirocco continued. "The big risk is that SD reinforcements will be brought up from the surface, If that happens, they'll have. Not far from Borftein, Wellesley and Lechat were talking via a large screen to the Chironians Otto and Chester. Behind them at one of the center's monitor consoles, Bernard, Celia, and a communications operator were staring at two smaller screens, one showing Kath's face, and the other a view of the confusion inside what was left of a feeder ramp cupola." "Sure." Clem gestured vaguely behind him. "There's a big room back along the corridor that's free and should hold everybody. We could all get some coffee there too. I guess you could use some--you've had a long trip, huh?" "They do. How could it be up to anyone else?" The suspicion he'd directed at Wendy Quail had been misplaced..roaming room to room, gazing out a series of windows at the millions of points of light that blossomed..cruising at sixty miles per hour..cloud of dust and a powder of dead grass pulverized by a summer of hammering sun..northeast and southwest of the truck stop..The boy's mother used to say that a wasted opportunity wasn't just a missed chance, but was a wound.Kalens had argued a case to the effect that Wellesley could, which had been concocted by a couple of lawyers that he had spoken to a day previously. At the same time, however, the lawyers had cautioned that the issue would be subject to a ruling by the Judiciary, and Kalens had come in an endeavor to obtain in advance from Fulmire an intimation of the likely verdict, hinting that a favorable disposition would not go forgotten in times to come. The endeavor had backfired spectacularly.."Hey, back off, soldier," Ci said suspiciously. "We're still strangers. Later, who knows? Give it time." The features behind the other's visor remained unsmiling. "Mister Fallows to you, Sergeant." The voice was icy. "I'm sorry, but I have work to do. I presume you have as, well. Might I suggest that we both get on with it." "And now I myself am off to have a nice sit-down." "Sure, I'd cover that." just for the kick of tricking the machine..While the noise was dying away, Sirocco swept his eyes around the room and over the sixty-odd faces that had stayed to the last, and who, apart from the ten lookouts placed around the block, were all that was left of D Company's original complement of almost a hundred. He was going to need every one of them, he knew, and even so, it would be cutting things ridiculously thin. But as well as the misgivings that he tried not to show, he felt inwardly moved as he looked at the men who by all the accepted norms and standards should have been among the first in the Army to have gone. But apart from the SD units, D Company's record was second to none. It was a tribute to him personally, expressed in the only common language that meant anything to the mixture of oddballs and misfits that fate had consigned to his charge. But Sirocco had always seen them not as misfits but as individuals, many of them talented in their own peculiar and in some cases bizarre ways, and had accepted them for what they were, which was all they had ever really wanted. But the term misfit was a relative one, he had come to realize. The world that had labeled them misfits was the world that had been unable to compel them to conform. Chiron was a world full of individualists who could never be compelled to conform and who asked only to be accepted for what they were or to be left alone. Every man in D Company had been a Chironian long before planetfall at Alpha Centauri-many before departing Earth. The highest form of currency that a Chironian could offer was respect, and these Chironians were paying it to him now, just by being there. Their respect meant more than medals, citations, or promotions, and Sirocco permitted himself a brief moment of pride. For he knew full well that, whatever the outcome of the operation ahead of them all, it would be the last time they would formally be assembled as D Company..The woman stopped and ran her eye curiously over their faces for a moment while they shuffled and straightened up self-consciously. "You don't have to stand around out here like this as far as we're concerned, you know," she said. "You can come on inside if you want. How about a coffee, and maybe something to eat?" The faces turned instinctively toward Colman as he rejoined them..dedication is too effusive and in need of cutting. That's something else we'll have to leave to Sirocco to decide." "I wish I felt as confident as you sound. It seems risky." "Not when you've got the best outfit that the Army ever." "We could probably arrange a visit for you too," Chang offered. "There's a large

They were regular infantry, Lesley could see. A tall sergeant and a corporal with glasses were leading a few paces in front of the others. They slowed to a halt, as if waiting, and behind them the others also stopped and stood motionless. Lesley's jaw tightened as he stared down through the observation port. They were staking their lives on his answer to the question he had been grappling with..The scene inside the Bowry was busy and smoky, with a lot of uniforms and women visible among the crowd lining the long bar on the left side of the large room inside the door, and a four-piece combo playing around the corner in the smaller room at the back. Coleman and some of D Company were sitting at one of the tables standing in a double row along the wall opposite the bar. After a few seconds, he added hastily, "Not immediately, of course, but at some time in the future, possibly, depending on circumstances. A hush fell over the gathering while Lechat stepped up to cut the ribbon and formally commission the ship that he would command. Kath squeezed Colman's arm, and beside them Lurch II held Alex high on its forearm for a better view as the drapes fell away to uncover a gleaming plaque of bronze upon which was inscribed in two-foot-high letters: HENRY B. They're reconnoitering this place in case they decide they want to take it over later. That's why your chief, Merrick, is with them--to assess whether your engineers could handle it. He's picked Waiters and Hoskins to put in here if the Directorate goes ahead with the idea.".Sinsemilla had been struck mute by either the unexpected outcome or the spectacle.."Was it ever like this? I certainly don't remember.."that was just a little too hasty. "The last time we went to see the complex at Port Norday." Bernard stared blankly at him. Merrick seemed pained. "Don't tell me you didn't know. I went there with Walters and Hoskins a while ago. Didn't Walters tell you about it?".CHAPTER THIRTY-ONE.Sinsemilla wasn't in the living room..Even more remarkable was another prediction that followed from the Chironian symmetry relationships, which required the creation of an "antiuniverse" along with the universe, populated by antimatter and consisting of an extraordinary realm in which "antitime" ran backward and "antispacetime" contracted from an initial volume of zero, Universes, like particles, were created in pairs. And it was the duality of universes, each exhibiting a spacetime decomposed into two discrete dimensions, which gave rise to the two-way duality manifested by tweedles and antitweedles: Dums, dees, antidums, and antidees were simply spacelike, timelike, antispacelike, and antitimelike projections of the same fundamental entity existing in the timeless, spaceless domain of tweedlespace..reassemble them into their original architectures..Jay began speaking earnestly and in a low voice. If they do the Chironians will take out the whole ship. Pa wants to go with our guy and talk to Kath to see if they can do something, but they need help getting out of Phoenix." "But doesn't this kind of thing upset the kids when it happens?" Hanlon had asked uneasily..only wanted to take Luki." "I didn't think the Chironians would go that far." he said. "I thought they would react only against direct violence. Why couldn't they have just let everything die a natural death?" "Thank you. Are you sure your mother wouldn't like to join us?"..Another flash of stars and they were in Idaho, one of the two fixed modules that carried the main support arms to the Spindle. Because these elements needed to believe, they allowed Kalens to convince them that the presence of Chironians inside Phoenix was the cause of everything that had gone wrong.
