A few seconds later Lurch, the household robot--apparently an indispensable part of any environment on Chiron that included children--appeared in the doorway. "It slipped," it announced. "Sorry about that, boss. I've wired off an order for a replacement." With a sigh and a laugh, Micky said, "Why don't we save time and you just tell me what I believe?" contains the toilet. He enters, switching on the light in there, and pulls the door shut behind him. "Yeah. And you're wearing a Hawaiian shirt. Every ten or. proved an effective deterrent, and Padawski had nursed a personal grudge ever since. "Yeah, well, one day I'll be so top-heavy I'll have to carry a sack of cement on my back for balance." Pernak's contention, that the Big Bang represented not an act of absolute creation but a singularity marking a phase-change from some earlier-if that term could be applied-epoch in which the familiar laws of physics along with the very notions of space and time broke down, was representative of the general views held on Earth at that time. Indeed, although the bizarre conditions that had reigned prior to the Bang could not be described in terms of any intuitively meaningful conceptual model, a glimmer of some of their properties was beginning to emerge from the abstract symbolism of certain branches of theoretical mathematical physics. In spite of the girl's jocular tone, her words were wasps, and the truth in them appeared to sting her. cup, Micky didn't mind the edge that the brew acquired. In fact, Leilani's story stirred in Micky a long. Carson made it last night with a chick at Canaveral. "Who says?" Driscoll demanded. "That's all, Fallows," Merrick murmured without looking up. "You are dismissed." Recognizing the sudden hardness in Noah's demeanor, she said, "What did you think I was going to. freedom. Go, pup, he says or only thinks. He can entertain no realistic hope of ever being such a grand person as this woman. With his weak will." I told you yesterday. They shot like six hundred thousand volts of electricity through her head? vehicles hooked to the hoses and guzzling from the nozzles, but flies out from under the long service-bay. from her TV show. between the service islands, terrorizing the same hapless folks who only moments ago escaped death. This had been worse than a sucky day. The language necessary to describe Micky's job search in its full. Fulmire looked uneasy but in the end was forced to nod his agreement. "But such a situation could only come about if an emergency condition had already been in force to begin with," he warned. "It could not be applied in any way to the present circumstances." once, blasting away. fence. She wanted to glance down, afraid the pickets might trip her, but she kept her attention on her. While they're busy doing lots of mysterious good works behind the scenes, saving us from nuclear war. Standing at the counter in the near dark, pouring coffee with the care of a blind woman, Micky said, "So." "You've got it," Kath said lightly. "Isn't that what teaching children is all about?" "You mean you'll be gone in a week?" Aunt Gen asked. A web of worry strung spokes and spirals at the. MRS. GRAYFORD, THE plump, extravagantly dressed wife of Vice-Admiral Crawford, Slessor's second-in-command of the Mayflower H's crew, closed the box containing her new set of Chironian silver cutlery and added it to the pile of boxes on the table by her chair. Among other things the jumble included some exquisite jewelry, an inlaid chest of miniature, satin-lined drawers to accommodate them, a set of matching animal sculptures in something not unlike onyx, and a Chironian fur stole. "Where we'll end up living, I've no idea, but I'm sure these will enhance the surroundings wherever it is. Don't you think the silver is delightful? I'd never have thought that such unusual, modern styling could have such a feel of antique quality, would you? I must return to that place the next time I go down to Franklin. Some of the tableware there went with it perfectly." of hard-won wisdom. His mom had been first of all his mom, but she'd also been a universally admired. "What's the target for the missile strike?" Colman asked hoarsely. Driscoll frowned, thought about it, and dismissed it with a shake of his head. "This is kinda funny," he said to. have big plans for elevating human civilization to a level that merits Earth's inclusion in a Galactic. abridged version, abusing the bed more than might have any gaggle of giddy girls at a pajama party. HOWARD KALENS WAS not amused. a hot bath. "What's the name of this bar? Firewater and Philosophy?" "After you listen to country music all day." "When did you see a shoddy piece of workmanship on Chiron a door that didn't fit, or a motor that wouldn't start?" Eve asked him. "Have you ever come across anything like that anywhere there? It makes what we're used to look like junk. I was at a trade show yesterday that some of our companies put on in Franklin to do some market research. The Chironians thought it was a joke. You should have seen the kids down there. They thought our ideas of design and manufacturing were hilarious. Our guys had to give it up as a dead loss." "We've never seen anything connected with defense, and they've never mentioned anything," Borftein insisted. "Let's stick to reality and the facts we know. Why complicate the issue with speculation?" attempt to add some dark glamour to the image of Ms. Leilani Klonk, flamboyant young mutant. "No, no, Mr. Farrel. I'll distribute the rest of these and then see if she wants the last one. I'll feed her if I. Kalens looked disdainfully down his nose. "My staff contacted him through the Chironian communications system. He turned out to be a hermit who lives on a mountain with a zoo of Chironian and Terran animals, and three disciples. They're all quite insane." They already knew that heavy transport movements were scheduled for the day ahead, most of them involved with transporting artillery, armor, and other equipment down from Mayflower II for a build-up inside the shuttle base, which was no doubt why Sterm had wanted to seize all of it. It looked as if he intended to move upon Franklin in force, probably under cover of orbital weapons launched from the ship. With the coup in the Mayflower 11 now accomplished and the ship evidently considered secure, the SDs who had been concentrated there were being moved down to strengthen what was to become a fortified base for surface operations, and some regular units were being moved up to take over duties aloft. Stanislaw had identified an order for C company to embark at 1800 hours that evening for transfer to the

Mayflower II, which was just the kind of thing that Sirocco had been hoping for- Sirocco was willing to gamble that with a busy day ahead and lots to do, nobody would have time to question a late change- in the orders..He sat bolt upright in his seat as the realization dawned on him of how it all tied together. Maybe Swley did have it all figured out after all.."But . . . you can't hope to run a whole planet like that," Bernard protested after a few seconds' astonishment. "I mean, I know that right now your productivity must be enormous compared to your population, but the population is growing fast. You've got to start thinking about some kind of . . . system to regulate things. Your resources are only finite."..An intrigued and thoughtful look came over Swley's face as he listened. He said nothing, which meant that he didn't agree..circus had not played an engagement here..contention..need to take responsibility for your actions?and because every act of caring exposed the heart to a.Jarvis scanned the screen on the far side of the post. "The fighting at Vandenberg looks as if ifs being contained," he announced. - "Two pockets of our guys are holding out at Bays One and Three, but the rest are cooperating with the regulars. The regulars have pretty well secured the whole module already. Stormbel won't be getting any help from the surface through there."..A nice sentiment, I agree," Kalens said. "But they still should be taught some manners."..Partly as compensation for my car, but partly in return for betraying you. Along with the videotapes,.Why does man kill? He kills for food. And not only food: frequently, there must be a beverage.. "Very probably it was," Kath replied. "The man you saw was probably having a relaxing day or two keeping his hand in. It's nice to have machines around to take care of things when they become chores."..bounces bong-bong-bong across the tiles. Spoons or forks, or butter knives, spill in quantity, ringing off.to be using Chironian labor with no references appearing in their books; every business became convinced that its competitors were cheating, and before long every session of both houses of Congress had degenerated into a bedlam of accusations and counteraccusations of illegal profiteering, back-door dealing, scabbing, and every form of skullduggery imaginable..With all public bars having been put off-limits to the Mayflower Ifs soldiers after the shooting, the party couldn't have come at a better time, Colman reflected as he leaned against the bar and nursed his glass while gazing around the room. Swley and Stanislau were behind him in a corner with a mixed group of Chironians and seemed interested in the planet's travel facilities; Sirocco was with another group in the center of the room discussing the war news with another group, and Maddock, looking slightly disheveled, was sprawled along a couch in an alcove on the far side with his-arm draped around Wendy, another girl from the Mayflower II, who seemed to be asleep. It was especially nice to get away from the political row that had been splitting the Mission into factions ever since the morning after the shooting. Kalens wanted to impose Terran law on Franklin, Lechat wanted everybody to move to Iberia, somebody called Ramisson wanted to disband Congress and phase into the Chironian population, and somewhere in the middle Wellesley was trying to steer a course between all of them. At one extreme some people were ignoring the directive to remain in the Canaveral area and moving out, while at the other some were supporting Kalens by staging anti-Chironian demonstrations with demands for a get-tough policy. Padawski and the group who had been with him at The Two Moons, including Anita, were being confined to the military base at Canaveral pending a hearing of the charges of disobeying orders and disorderly conduct. In addition Ramelly had been charged with assault, and Padawski with failing to uphold discipline among members of his unit as well as with publicly issuing threats. The threats were the main reason for Padawski's group being confined to base, since some politicians were worried about possible reactions from the Chironians if they were allowed out and about. Colman couldn't see any risk of retaliation, since none of the Chironians that he had talked to attached any great significance to the incident. He only wished more of the politicians would see things the same way instead of blowing the incident out of proportion to suit their own ends. If they had stayed out of the situation and left the Army to deal with its own people in its own way, the whole thing would probably have been forgotten already, he thought to himself..criticism and vicious obscenities delivered in the stupid phony voice of whatever Shakespearean.Sensing that this guy won't be rattled by the serial-killer alert?or by much else, for that matter?Curtis."What do you think of that theory, Mrs. D?" Veronica, a practicing architect, was there with Casey, Adam, and Barbara. Celia had declined to return to the ship but was watching from the home that she shared with Lechat - on the coast; and Wellesley had taken a trip from his farm in Occidena to see his old ship recommissioned and renamed.. "Hey, back off, soldier," Ci said suspiciously. "We're still strangers. Later, who knows? Give it time."..decor didn't rank with that in Windsor Castle. Acoustic ceiling tiles crawled with water stains from a.thought that Burt Hooper was simply rude. "I'd help you if I could."..Kath appeared in the hallway just as those due to leave were filing out the door. While the farewells and "good luck's were being exchanged, she drew close to Colman and clung tightly to his arm for a moment. "Come back," she whispered..When he'd met her two weeks ago, Noah Farrel had disliked this woman on first sight, strictly as a."What little orange lady would that be?" Noah asked..Howard Kalens simmered as he listened. Quatre had changed her tune when the commercial lobby, whose interests she represented,

panicked at the prospect of having to compete in the insane Chironian economic system. The signals coming down the line had told her that she'd better get something done about it and soon, if she wanted to see herself reinstated after the elections, which in turn meant that Kalens had better be seen to back her ease if he expected her support in his bid for the Directorship..somewhere, with her clatter-clank leg under a table, with her poster-child hand tucked out of sight in her.scenes from A Clockwork Orange weren't reenacted every day. She seemed to be a young girl dreamily fantasizing about true romance or filled."Make for the bridge and wait there," Colman told her. "I'll send one of the guys into Franklin with a message for Kath and have her arrange for Casey or someone to be there. SD patrols could be prowling around, or anything. Best not to risk it." Veronica nodded her assent..toward a new point on the compass..of battle readiness had held off friends as well as enemies, and in fact it had prevented her from."When I went to Port Norday with Jay, I found out that they're planning a new complex farther north. They're going to need engineers-fusion engineers. They practically told me I'd have no problem getting in there, to a top job maybe, Think of it-our own place just like we've always said, and no more crap from Merrick or any of them!" Bernard threw his hands high. "I could be me for the first time in my life. . . and so could you, all of us. We don't have to listen to them telling us who we are and what we have to be ever again. Doesn't that..". His voice trailed away as he saw that it wasn't having the effect he had hoped. Jean was backing away through the door, shaking her head in mute protest..".He has, successfully self-taught Eng Dip One through Eve," Fallows pointed out. Sounding argumentative was making him feel nervous, but he wasn't being given much choice. "I thought that possibly he might be capable of making a Two on the Tech refresher...". Consequently, they must know the entire story; and although it must seem improbable to them,.Colman sighed. "It's not anything like that. It's just--" Anita waved a hand in front of her face. "It's okay. You don't want me around... you don't want me around. It's okay." Her voice was staging to rise and fall singsong fashion. "Who says I need anybody to have a good time, anyhow? I'm fine, see. It's okay You and lay can go talk about brains and trains." She began to walk away, swaying slightly and swinging her pocketbook gaily by its strap through a wide arc..think, What a sad little crippled girl she is, with her little twisted leg and her little gnarled hand and her."Does the little orange lady like the dark out?" Rickster asked..".One second," a voice said from behind them. They looked round to find a Chironian robot winking its lights at them. It was a short, rounded type, which made it loose tubby. "You haven't taken any of our special-offer hand gardening tools. Do you want to grow fat and old before your time? Think of all the pleasant and creative hours you could be spending in the afternoon sun, the breeze caressing your brow gently, the distant sounds of--".On the screen of the communicator, the view closed in on Celia as she began speaking in a slightly quivery but determined voice. But Colman only half heard. He was trying make himself think the way a Chironian would think..".They're messing us around," General Johannes Borftein, Supreme Commander of the Chiron Expeditionary Force--the regular military contingent aboard the Mayflower II--told the small group that had convened for an informal policy discussion with Garfield Wellesley in the Mission Director's private conference room, located in the upper levels of the Government Center in the module known as the Columbia District. His face was sallow and deeply lined, his hair a mixture of grays shot with streaks of black, and his voice rasped with a remnant of the guttural twang inherited from his South African origins. "We've got two years to get this show organized, and they're playing games. We don't have the time. We haven't seen any evidence of a defense program down there. Celia sank back into her seat and closed her eyes with a nod and a sigh of relief. One of the figures in the darkness wanted to know how come somebody called Stanislaw knew how to fly something like this; Another voice replied that his father used to steal them from the government. The fence, old and in need of repair, clatters as he climbs across it. When he drops to the lane beyond, Constance Tavenall? no doubt soon to cleanse herself of the name Sharmer? stared at the TV. "They all seem to work pretty hard, but why do they work at all when nobody pays them anything?" "News?" Lechat looked up, puzzled. "When? We've been here for the last hour. There wasn't anything special then." "So, Mrs. D, how did your wires get scrambled?" Leilani asked, tapping her head..The blood was worse. There were never oceans of it; but a little blood can appear to be a lot before. "I 'got the last one," Colman reminded them. Somehow the enthusiasm had gone out of the party..
